SUPERIOR PANEL CONSTRUCTION

specialises in the production of high quality, insulated steel roofing and wall cladding panels.

Our state-of-the-art manufacturing equipment produces a wide range of architecturally inspiring designs and sizes that will provide years of maintenance-free services for commercial and residential building applications.

The combination of extremely durable, coated steel external roofing, high quality insulation and attractive ceiling surfaces, supplied in easily installed modular panels, will greatly enhance personal comfort and working environments while saving both time and money.

Superior's corrugated roof panels can be supplied in both convex and concave designs, providing a range of unique and innovative options to suit your specific building and architectural applications.

SUPERIOR RANGE

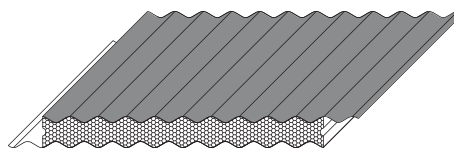

Our panels are available in three attractive designs:

Corro/Corrospan™ incorporates COLORBOND® corrugated steel finish on both sides - This product can also be supplied curved to suit your specific architectural design requirements.

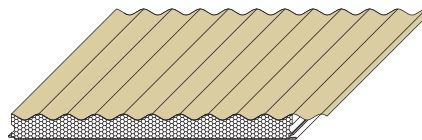

Corrospan™ combines COLORBOND® corrugated steel finish on one side with continuous COLORBOND® steel ceiling finish on the reverse side.

Monospan™ combines COLORBOND® steel roofing with continuous COLORBOND® steel ceiling finish on the underside.

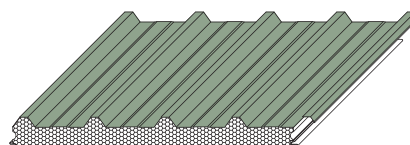

Panels span up to 9.4 metres in length and are supplied in convenient, easily handled 762mm wide sheets in thicknesses ranging from 50-175mm.

Corro/Corrospan and Curved Corro/Corrospan

Corrospan

Monospan

Wide Colour Range

Up to 9.4 Metres

Faster Installation

Lower Building Costs

Withstands Cyclones

Low Maintenance

Blocks Heat

10 Year Warranty

SUPERIOR PERFORMANCE

Superior's insulated roofing and wall cladding panels provide maximum insulation across the widest range of architectural design alternatives.

They provide maximum heat protection, even in Australia's harshest outback and tropical climates.

In cooler conditions, Superior's roof and wall panels assist in retaining warmth from winter sunshine, insulating against heat normally lost through ceilings and conventional building materials.

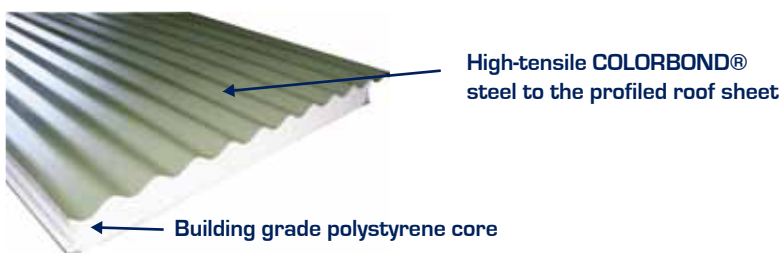

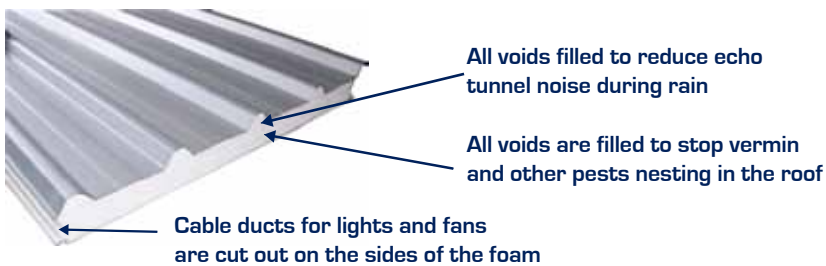

Superior panels not only create a more comfortable living and working environment; they also reduce heating and cooling costs. Factories, offices, school halls, gymnasiums, sporting complexes, residential projects – all will benefit from considerable savings in construction costs, heating and cooling costs and on-going maintenance expenses.

Additional benefits include reduced roof noise from rain or hail and reduced noise transmitted through walls and fencing.

SUPERIOR STRENGTH

In addition to being among the coolest range of metal roofing and wall cladding materials available, Superior's 'three-in-one' panels are also among the strongest, lightest and easiest to install.

High-tensile COLORBOND® steel roofing from Bluescope Steel, Australia's largest roofing material manufacturer, is bonded to both surfaces of a solid sheet of high density, solid polystyrene insulation. Our specially developed hi-tech adhesives have proven their strength and outstanding performance under the harshest environmental conditions.

SUPERIOR COLOUR RANGE

Superior's insulated steel panel range is available in the full colour palette from the COLORBOND® range. Standard ceiling colours are either Surfist™ or Classic Cream®.

COLORBOND®, colour names and ™ colour names are registered trade mark of BlueScope Steel Limited. The COLORBOND® steel colours shown are a guide only and may not accurately reflect the true colour. We strongly recommend that colours are checked against a sample of the actual product before ordering.

SUPERIOR VERSATILITY

Superior Panels do away with the need for rafters and battens, making them ideal for use in broad span outdoor entertaining areas. They are easily cut to suit curved or irregular angled floor plans, while the choice of flat, convex or concave roof or wall surfaces adds to the range of excitingly different design possibilities.

Our panels can be supplied cut to length in convenient widths, facilitating faster and easier installation and reducing costs by reducing wastage from off-cuts.

SUPERIOR WARRANTY

10 YEAR warranty on all COLORBOND® colours.

SUPERIOR SERVICE

When you deal with Superior Panel Constructions you'll be dealing with an enthusiastic team of highly qualified and experienced people who take genuine interest in meeting the specific needs of your commercial, industrial or residential building project.

ACCESSORIES

Superior Panels carries an extensive range of accessories to make assembly so much easier and more convenient. Steel posts, beam supports, wall top plates, end capping, gutterings, weather strips, lighting kits, sealants, primary and secondary fasteners can all be supplied to match selected roofing and wall panel colours.
